

MEDIA RELEASE | 9th December 2025

Greenland Strategic Minerals A/S Meets with Government Agencies – Agreement to Submit 3.0 Mtpa Exploitation Licence in Early 2026.

Nuuk, Greenland – December 2025 – Greenland Strategic Minerals A/S has met with Greenland’s Mineral Licence Department, the Inspection & Technical Department, and the Department of Environment and Mineral Resources to advance the SILA Technology Project (Southern Licence). Following constructive discussions across these agencies, the company has agreed to submit a 3.0 million tonnes per annum (Mtpa) mining exploitation licence application in early 2026, marking a major milestone in Greenland’s critical minerals development.

PROJECT HIGHLIGHTS:

- **Government Engagement:** Constructive meetings held with the Mineral Licence Department, the Inspection & Technical Department, and the Department of Environment and Mineral Resources confirmed regulatory expectations for the exploitation licence pathway.
- **Target Case:** A scalable 3.0 Mtpa modular mining and processing operation, aligned with Greenland’s updated Mineral Resources Act (2024).
- **Processing Strategy:** Mechanical separation in Greenland using magnetic flowsheets only, producing inert dry-stack tailings with no harmful effluent.
- **Downstream Refining:** Advanced refining staged outside Greenland (Europe, Korea, USA), ensuring compliance with Greenland’s low-impact mining framework.
- **Regulatory Alignment:** Exploitation licence to be held by a Greenland-registered company with a Greenland-based CEO.

Partnership with Greenland

- The SILA Technology Project is designed as a collaborative venture with Greenland’s people, ensuring that local communities are central to its success. “SILA” derives from the Greenlandic word meaning *air, sky, weather, and the natural world* — reflecting the Project’s commitment to balance, responsibility, and harmony with Greenland’s environment and culture.

Environmental & Social Responsibility

- Compact infrastructure footprint with progressive rehabilitation.
- Direct employment and training opportunities for Greenlanders.
- Prioritised local procurement to strengthen Greenlandic businesses.
- Transparent annual reporting under the Mineral Resources Act.

Strategic Relevance

SILA's rare earths are critical for EV motors, wind turbines, semiconductors, aerospace, and defense systems. By providing a secure, non-Chinese source of rare earths, SILA supports Western diversification strategies under the EU Critical Raw Materials Act, the U.S. Inflation Reduction Act, and the Defense Production Act.

Market Interest

Early offtake discussions with partners in South Korea and the United States validate SILA's economics and reinforce Greenland's role as a trusted supplier of ESG-compliant concentrates.

Next Milestone

The Exploitation Licence application for 3.0 Mtpa will be formally submitted in January–February 2026, positioning SILA as Greenland's newest and most credible rare earths development.

About Greenland Strategic Minerals A/S

Greenland Strategic Minerals A/S is a Greenland-registered company under the Mineral Resources Act (2024), headquartered in Kommune Kujalleq with a technical base in South Perth, WA. The company is committed to responsible, transparent, and sustainable resource development that delivers lasting benefits to Greenland's people and positions the nation as a global leader in critical minerals supply.
